01

## DATA AUDIT FOR COMMERCIAL CONTRACTING SYSTEMS

Mindlance has developed a noninvasive data audit utility that identifies data integrity issues in commercial contracting systems. Data integrity and reliability issues can lead to areas of revenue leakage and erroneous reporting.

### WHY PERFORM A DATA AUDIT?

- ↳ Expose areas of revenue leakage
- ↳ Identify performance and efficiency bottlenecks
- ↳ Discover data integrity issues
- ↳ Proactively identify key risk areas before they become problematic

## DATA AUDIT SCOPE

Data is analyzed to reveal date and status conflicts, inconsistencies, duplicates, and configuration issues. Data in the following areas will be reviewed:

- ↳ Customers
- ↳ Membership and Eligibility
- ↳ Products and Pricing
- ↳ Contracts, Price Groups and Tiers
- ↳ Submissions, Adjudications and Settlements

## DATA AUDIT RESULTS

The Mindlance data audit utility will generate a summary report highlighting areas of data inconsistency. The utility also creates an encrypted detailed report that can be reviewed by our data audit specialists to create a roadmap to an efficient, compliant and revenue-maximizing commercial contracting operation.

## WHY MINDLANCE?

MINDLANCE PROVIDES THE TECHNICAL EXPERTISE REQUIRED TO REALIZE THE COMPLETE BENEFIT FROM CONTRACTING AND COMPLIANCE SYSTEMS AND THE POWERFUL DATA THEY SUPPLY. WE BRIDGE THE GAP BETWEEN FUNCTIONAL AND TECHNICAL ORGANIZATIONS THROUGH AN IN-DEPTH UNDERSTANDING OF YOUR COMPLEX BUSINESS ENVIRONMENT AND THE SOFTWARE THAT SUPPORTS IT.
