## I-MANY GP DATA RECONCILIATION AND AUDIT REPORTS

Increase compliance and audit readiness with an automated process to reconcile transactional data in the I-many Government Pricing system. Mindlance Life Sciences offers a set of reports within I-many GP that reconcile transactional data between I-many CARS and I-many GP.

## FEATURES

- Installs as a standalone discipline in I-many GP; no product custom required
- Easy installation and configuration
- Validates existing data
- Expose any integration or process issues
- Increase audit readiness

## HOW IT WORKS

Once installed, a new discipline will be created within the I-many GP application. For any given date range, the reports will compare transaction data loaded into I-many GP against actual chargeback, rebate and fee transactions in I-many CARS. Any differences will be reported in detail and made available to import into I-many GP via the manual transaction adjustment utility.

The reconciliation process does not use your existing interfaces to retrieve data from I-many CARS; it reads directly from your CARS database. This ensures any data integrity issues are exposed.

## WHY MINDLANCE?

MINDLANCE PROVIDES THE TECHNICAL EXPERTISE REQUIRED TO REALIZE THE COMPLETE BENEFIT FROM CONTRACTING AND COMPLIANCE SYSTEMS AND THE POWERFUL DATA THEY SUPPLY. WE BRIDGE THE GAP BETWEEN FUNCTIONAL AND TECHNICAL ORGANIZATIONS THROUGH AN IN-DEPTH UNDERSTANDING OF YOUR COMPLEX BUSINESS ENVIRONMENT AND THE SOFTWARE THAT SUPPORTS IT. LET OUR AUDIT SPECIALISTS CREATE A MORE COMPLIANT AND RELIABLE GOVERNMENT PRICING ENVIRONMENT FOR YOU TODAY.
