## CHECK REQUEST AND PAYMENT CONFIRMATION INTERFACES

Greater participation in state and supplemental programs has increased the volume of check requests from the I-many Medicaid system. Replacing a growing manual check request process with automated data integration will reduce errors and processing time. Mindlance Life Sciences has developed a simple toolset that enables fully automated integration between I-many Medicaid and any Accounts Payable system.

## FEATURES

- Fully automate the check request and confirmation process
- Save time and eliminate errors
- Easy installation and configuration
- Packaged solution allows for greatest value
- Optional custom integration into your AP systems
- No customization to base I-many product code is required

## HOW IT WORKS

Once the toolset is deployed, any settlements that have been approved for payment will be automatically set to a 'Check Requested' status and full details will be sent to a flat file or staging area. Your AP system can then pick up the payment request, issue payment, and send a confirmation back to I-many Medicaid via the staging area or a flat file. Finally, the toolset will validate the confirmation, update I-many Medicaid with the payment information and close the settlement.

## WHY MINDLANCE?

MINDLANCE PROVIDES THE TECHNICAL EXPERTISE REQUIRED TO REALIZE THE COMPLETE BENEFIT FROM CONTRACTING AND COMPLIANCE SYSTEMS AND THE POWERFUL DATA THEY SUPPLY. WE BRIDGE THE GAP BETWEEN FUNCTIONAL AND TECHNICAL ORGANIZATIONS THROUGH AN IN-DEPTH UNDERSTANDING OF YOUR COMPLEX BUSINESS ENVIRONMENT AND THE SOFTWARE THAT SUPPORTS IT. LET OUR INTEGRATION EXPERTS CREATE A MORE EFFICIENT AND RELIABLE MEDICAID REBATE ENVIRONMENT FOR YOU TODAY.
